----------------	--

Skills

Technical

- Python, Golang, Django, DRF, FastAPI, PostgreSQL, SQLite, SQL, Yandex.Cloud, Docker, Nginx, Linux, Git

Languages

- English(B1), Russian(native)

Projects

Foodgram 🍴

- On this service, users can post recipes, subscribe to other posts, add favorite recipes to their Favorites list, and download a summary of the products they need before going to the store to prepare one or more selected dishes
- used Python, Django, DRF, Gunicorn, Nginx, Docker, Docker-compose, PostgreSQL, drf-simlejwt

Telegram Bot 🤖

- The bot receives data via API from the Yandex-Practicum website. Checks the result and compares it with the previous query. Generates a response and sends it to the Telegram chat.
- used Python, python-telegram-bot 13.7

Api YaMDB(Group project) 🗄

- The project provides access to the YaMDB service via an API. My task was to describe models, view and endpoints for products, categories, genres, as well as implement data import from csv files, etc.
- used Python, Django, Django Rest Framework, Simple JWT, SQLite3
